

The NHS Smokefree Pledge

We acknowledge that:

- Smoking is the single greatest cause of premature death and disease in our communities;
- 1 in 4 patients in acute settings are smokers and that staff working for the NHS also smoke;
- Smoking places a significant additional burden on health and social care services and is impacting on the future sustainability of the NHS;
- Reducing smoking in our communities increases disposable household incomes and benefits the local economy;
- Reducing smoking amongst the most disadvantaged in our communities is the single most important means of reducing health inequalities;
- Smoking is an addiction largely taken up by children and young people, two thirds of smokers start before the age of 18;
- Smoking is an epidemic created and sustained by the tobacco industry, which promotes uptake of smoking to replace the 80,000 people its products kill in England every year; and

We welcome:

- The Government's commitment to achieve a smokefree future and reduce smoking rates to less than 5 per cent;
- NICE public health guidance on tackling smoking particularly PH48, PH45 and PH26;
- Endorsement of this declaration by central government, Public Health England and others.

In support of a smokefree future we Tees, Esk and Wear Valleys NHS Foundation Trust commit from this date 27/2/18 to:

- Treat tobacco dependency among patients and staff who smoke as set out in the Tobacco Control Plan for England;
- Ensure that smokers within the NHS have access to the medication they need to quit in line with NICE guidance on smoking in secondary care;
- Create environments that support quitting through implementing smokefree policies as recommended by NICE;
- Deliver consistent messages to smokers about harms from smoking and the opportunities to quit in line with NICE guidance on brief advice;
- Actively work with local authorities and other stakeholders to reduce smoking prevalence and health inequalities;
- Protect tobacco control work from the commercial and vested interests of the tobacco industry;
- Support Government action at national level;
- Join the Smokefree Action Coalition.
